Fox wants to keep commuters moving; creates special unit

Commissioner **Jamie Fox** recently cut the ribbon for the new Howard Boulevard Park and Ride lot in Mt. Arlington, Morris County and announced the creation of a Park and Ride Coordination Unit within NJDOT.

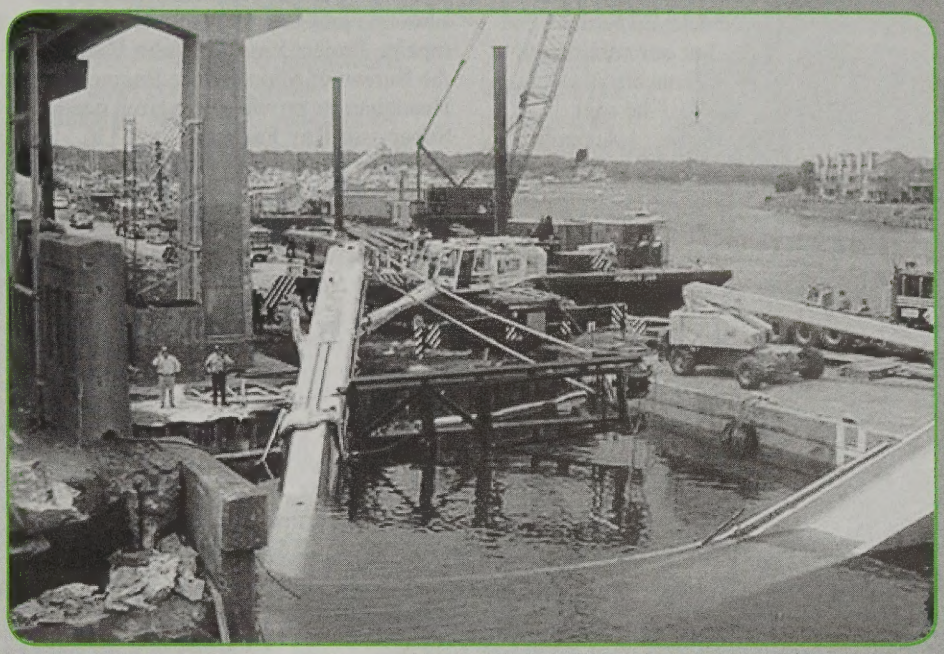
The event marked the halfway point for the $10.3 million, two phase project to alleviate congestion on I-80 and to provide commuter parking in Morris County. Although Phase I was federally funded, NJDOT will fund Phase 2.

Project Engineer Scott Thorn, Lakeland Bus Company President Marta Mazzarisi and Commissioner Jamie Fox were at the opening of the Howard Boulevard Park and Ride.

"This facility will include a bus park and ride with 235 parking spaces," said Fox. "Phase 2 will create a new rail station with 500 additional parking spaces."

Because of the increase in mass transit ridership, the Legislature now requires NJDOT to report yearly on its progress in expanding the state's park and rides. There are 74,000 parking spaces available to commuters at 240 facilities statewide. The newly created Park and Ride Unit at NJDOT will coordinate these efforts.

Continued on back page



The concrete beam for the new Route 35 Bridge is submerged in the Shark River. The existing bridge was shut down because a portion of the concrete beam also punched a hole into the sidewalk along the southbound lanes as it fell into the water. Photo credit: Sr. Engineer Joe Maloney of Central Region Materials.

Crews meet challenges during long, hot summer

The summer to remember — with 32 days of sweltering 95-105 degree heat and New Jersey's famous high humidity — challenged NJDOT's crews on the state's bridges and roadways.

The Shore

The closing of a major Jersey Shore bridge in Belmar and Neptune on July 29 was a dramatic example. A concrete beam of the new Route 35 span under construction over the Shark River snapped in half, damaging a crane and a portion of the 1932 vintage bridge.

"One or both crane operators lost control of the beam, causing it to roll onto its side," said **Arthur Silber**, Assistant Commissioner for Capital Program Management (CPM).

"Because the beam is not designed to take that kind of horizontal stress, it cracked under its own weight. Half the beam plunged into the Shark River, just a few feet from the channel; the other half yanked off the arm of the crane."

"Essentially the accident caused the closing of the bridge, the roadways and the channel to boat, vehicle and pedestrian traffic until mid-afternoon when the bridge was opened to northbound traffic and the channel reopened to charter fishing boats," said **Michael Moran**, Principal Engineer. He helped coordinate Department resources, Operations and CPM.

The incident happened after a series

Continued on page 2

Executive Director Bernard James takes a call on his cell phone while Rich Shaw, Director of Operations Support and Dave Sichik, Director of Construction & Material Services confer with Principal Engineer Michael Moran on a portion of the old Route 35 bridge span.

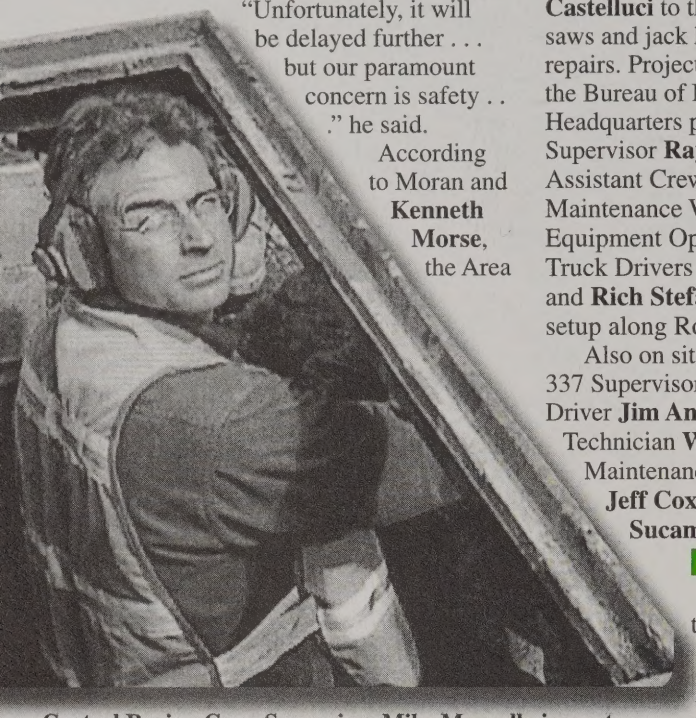
Crews meet challenges

Continued from front page

of setbacks in the bridge construction, scheduled for completion in 2003, according to Director of Communications and NJDOT spokesman **Micah Rasmussen**.

"Unfortunately, it will be delayed further . . . but our paramount concern is safety . . ." he said.

According to Moran and **Kenneth Morse**, the Area Supervisor, crews from Region Central were immediately on the scene. Assistant Crew Supervisor **Kevin Hoppey** and Maintenance Worker **Joseph Rossi** of Crew 324 assisted in the diversion of traffic for northbound Route 35; Assistant Crew Supervisor **Scott Ireland**, Equipment Operators **David Johnson** and **Robert Iadanza** and Maintenance Worker **Ed Casey** assisted in the diversion of traffic for southbound Route 35; and Crew Supervisor **Kevin Beer**, Technician **Gavin Petillo**, Electrical Mechanics **William Appleby** and **Ed Rappleyea** assisted the contractor with the installation of service wires.



Central Region Crew Supervisor Mike Manzella inspects a collapsed drain basin on Route 22 in Lopatcong Township.

The North

Meanwhile, motorists can travel without incident along Route 22 in Lopatcong Township on a newly repaired section at milepost 1.8 thanks to the repairs done by North and Central Region crews after spring storms collapsed drain basins in the area.

When Crew 365 Supervisor **Mike Manzella** and Assistant Supervisor **Donald Noorman**, Construction & Bridge Repairers 1 **Larry Rivera** and **Alfredo Cristofaro**, Maintenance Workers 1 **Keith Bergman**, **Ron Fisler** and **Joe Antonowicz** inspected the damage from several basins overflowing and one basin collapsing, they plated the area.

After **Dennis Mennella**, Vactor Operator of Crew 335 cleaned the collapsed basin and unplugged the downstream line, they noted 75 percent of the basin needed rebuilding.

To complete the necessary repairs, North Region's Regional Maintenance Engineer **Aram Mardekian** offered help by sending Crew 257 Assistant Supervisor **Hank Stillwell** and Construction & Repair Workers 1 **Tom Dapkiewicz** and **Frank Castelluci** to the area with walk-behind saws and jack hammers to assist with the repairs. Project Engineer **John Rainero** of the Bureau of Maintenance Engineering at Headquarters provided the grout needed. Supervisor **Ray Farley**'s Crew 336, Assistant Crew Supervisor **Rich Stangle**, Maintenance Worker 1 **Joan Heller**, Equipment Operator **Brian McQuaid** and Truck Drivers **Gene Mickel**, **Joe Schocko** and **Rich Stefano,** provided the safety setup along Route 22.

Also on site were Assistant Crew 337 Supervisor **Bill Deemer**, Truck Driver **Jim Anderson** and Landscape Technician **Wayne Rogers** and Crew 319 Maintenance Workers 1 **Matt Beatty**, **Jeff Cox**, **Bob Phillips**, **Angelo Sucameli** and **Jeff Snyder**.

Midstate

Two heat related incidents took place on Route 1.

Traveling northbound at 3:30 p.m. on the first Friday of August, the road at the intersection of North Oaks Boulevard in North Brunswick buckled due to the severe heat. Cars bottomed out as their undersides rubbed on the roadway.

Central Region's Area Supervisors **John Andrews** and **Jim Farrell** were on the scene; Acting Crew 310 Supervisor **John Mateyka** organized the job.

"The job involved milling and we had to shut a lane down," remarked Mateyka. "We had nine guys from five crews out there until 7 p.m."

Crew members involved were: Equipment Operators **Guiseppi Burton** and **Keith Schuchardt** of 310 and **John Saluka** of 311; Assistant Crew 365 Supervisor **Donald Noorman**; and Maintenance Workers I **Keith Bergman** and **Joe Antonowicz** of 365, **Steve Werensly** and **Wayne Mayers** of 346 and **Kevin McPeek** of 319.

"Days later, the heat caused major damage to a section of Route 1 near Meadow Road," said Mateyka. "I was traveling northbound from Trenton when I saw a live wire snap onto Route 1 southbound. It was like a snake dancing across the road with 50,000 volts of power."

Mateyka went into action by blocking off traffic from the live wire and the burned roadway. Local police, Public Service Electric and Gas Company and the local fire departments responded within minutes.

Crews 316 and 369 worked four-five hours to cut out the 200 square feet of damaged roadway and repave it. On the scene were **Bobby Sciavone**, Crew 316 Supervisor, Truck Drivers **Jim Mate** and **Craig Kamiec**, **Stan Dombrowski**, Equipment Operator, Maintenance Workers 1 **Todd Greener** and **Todd Hirth** and **Frank Bocchini**, Crew 369 Supervisor, **Lou Cortina**, Assistant Crew Supervisor, **Melvin Levrett** and **John Zabicki**, Construction Repair 1 and 2 and **Bruce Hoffman**, Maintenance Worker 1.

Storms took their toll, too. On the first Friday of August heavy rains and damaging winds pelted Hunterdon, Mercer, Middlesex, Monmouth, Somerset and Ocean counties. In 63 hours, NJDOTers handled 115 emergency calls for traffic signals. Good organization for handling these emergencies was key.

Members of different crews and their supervisors worked under the 'team' direction of **Jim Miller,** Crew 380, Regional Supervisor, Central Region, primarily out of Trenton and Wall Township.

Despite the storm, they handled a traffic signal knockdown for Wall Township on Route 35 in Red Bank.They replaced a controller cabinet damaged by high voltage on Route 18 in East Brunswick and made 113 other repairs.

Team members included Assistant Regional Supervisors **Leon Kuliczkowski** and **Richard Sawicki**; Crew Supervisors **Russell Bellmont, Mario DiFiore, Anthony Bucci, Terry Quinn, Steve Chillemi** and **Kevin Beer**; Electrical Mechanics 1 **Michael Barbiero, Trevor Halloran, Greg Seaman, Dave Peters, Jiasui Peng, Don Montgomery, Ray Hartmann, John Del Conte, Ed Owens, Ed Rappleyea, John Romagnoli, James Davis, Howard Folbrecht, Jay Raio, Thomas Walsh** and **William Appleby**; and Micro Electrical Systems Technicians **Jerry Urbano, Pedro Diaz** and **Gavin Petillo**.

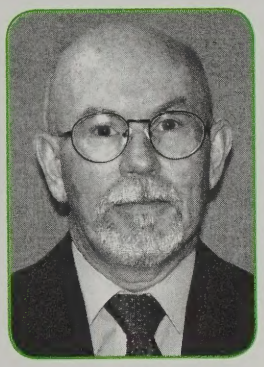
People Briefs

Fox names Keck, Silber Assistant Commissioners

Commissioner Jamie Fox appointed **W. Dennis Keck** to the position of Assistant Commissioner of Planning & Development and **Art Silber** to the position of Assistant Commissioner for Capital Program Management (CPM).



Keck

Formerly Keck managed CPM, NJDOT's Portway initiative and served as Chairman of the I-95 Corridor Coalition Steering Committee.

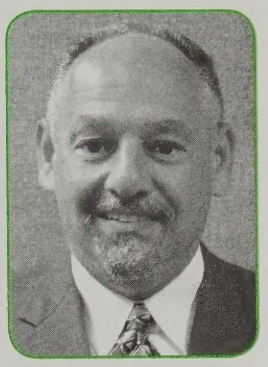
Keck is very specific about his current goals. "Some of my objectives are to continue to improve the Metropolitan Planning Organizations (MPO) and Federal Highway Administration (FHWA) relations by raising the communications level of the Statewide Transportation Improvement Program (STIP), its sub-elements and the Regional Transportation Plan.

Also, focus is on the implementation of the revised Capital Pipeline Process, in cooperation with CPM. And, of course, we plan to advance Portway and statewide freight systems planning."

Another long-term employee, Silber began with the Department in 1975 as a Construction Inspector working on bridges.

"One of my goals is to eliminate the backlog of structurally deficient and functionally obsolete bridges in the shortest time possible," he said.

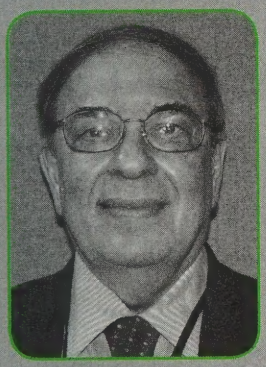
The former Director of the Division of Project Management managed all segments of the Capital Program from inception to construction.



Silber

"My main emphasis now is to redesign and implement the Department's revised Capital Program Pipeline to enable a swifter and more directed delivery of the capital projects without sacrificing quality." Silber said. "Our goal is to increase the Department's production and delivery of transportation improvement projects to help restore the infrastructure, improve safety and reduce congestion."

Salman to expand Inspector General role



Salman

Commissioner Jamie Fox announced the appointment of **Robert R. Salman** as Special Assistant to the Commissioner for Program Assessments and Director of the Office of Inspector General.

An adjunct law professor at Seton Hall Law School from 1995 until 1998, Salman's goals for the Inspector General's Office include focusing on major programs, reports and investigations traditionally done by Inspector General staffs.

"More specifically, I hope to be able to issue one or more special investigative reports that would help to enhance the already existing outstanding reputation of NJDOT," said Salman.

With a specialty in commercial litigation and litigation prevention, Salman has published more than a dozen articles in various legal periodicals.

Jim Snyder moves to Local Aid

"The Local Aid Programs are valuable tools in helping the Department meet our goals of Fix-It-First and Smart Growth," said Commissioner Jamie Fox as he announced the appointment of 28-year NJDOT veteran **James J. Snyder** to Director of the Division of Local Aid and Economic Development.

Snyder managed the Office of Portway and Local Government Services, District 4, and will continue those responsibilities in addition to his new position.

He has focused on three goals. "For the communities, we help preserve the existing infrastructure, we improve local quality of life and we provide property tax relief," said Snyder. "Second, I believe we need a renewed focus on our distressed urban cities. And, third, my personal goal is to give the staff the support they need to do their jobs."

Snyder

Sichik, Errico, Kingsland move up

David A. Sichik is the Acting Director, Division of Construction and Materials; **Linda Errico** is the new Manager of the Disadvantaged Business Enterprise Unit; **C. William Kingsland** is Executive Assistant in the South Region.

AAMVA Conference pulls in large crowd

Francis P. Crahan, Director of Government Relations for U-Haul International and his wife Velva chat with W. Patrick Scheffer, MVS Director of Driver Control & Regulatory Affairs and Region 1 AAMVA President.

They came, 374 strong — from Bermuda, Connecticut, Delaware, the District of Columbia, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania, Vermont and the eastern Provinces of Canada — to attend the American Association of Motor Vehicle Administrators (AAMVA) Region 1 Conference in Atlantic City in July.

At the business end there were a dozen plus seminars and numerous sponsor displays; at the fun end there were side trips to local attractions for adults and children.

At the opening ceremonies, **W. Patrick Scheffer**, MVS Director of Driver Control & Regulatory Affairs and the Region 1 AAMVA President welcomed everyone to New Jersey and the 81st conference. "Safety & Service through Technology..., for shore" was the theme.

MVS Director **Diane L. Legreide** told the group about upcoming improvements in New Jersey that include major changes in technology and customer service.

Other speakers included Ernest Coursey, Deputy Mayor of Atlantic City, Alan Cockman, AAMVA Chairman of the Board and Linda Lewis, President & CEO, AAMVA.

"This was a big event," said Scheffer. "It's the first time since 1968 New Jersey hosted this conference. It's a great showing of how the Northeast members can get together to work on solutions to common problems."

After September 11, homeland security became top priority in most eastern states and the Canadian provinces. At one session, Scheffer moderated a panel on Commercial Motor Vehicles (CMVs) that emphasized the safety issue.

Linda R. Lewis, President and CEO of AAMVA praised the CMV International Registration Plan (IRP), a clearinghouse for all commercial vehicles. Basically a cooperative agreement for vehicles that travel interstate, those carriers must file applications within their jurisdiction. The CMVs need those registration credentials to operate on interstate roadways.

Director Frank D'Onofrio of Ontario Ministry of Transportation in Toronto, Canada explained how Ontario levies fines of up to $20,000 and/or impounds trucks, buses or trailers with safety defects.

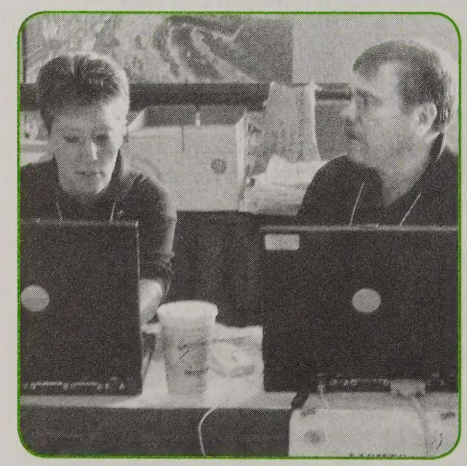
MVS Supervisor **John M. Sparano** presented a demonstration of registration made easy through New Jersey's IRP on our Web site. A CMV owner can download the form from the site and fill it out before or after printing, then mail it to the IRP Section of Motor Carriers at MVS.

NJ State Police Trooper Joseph Duble explained that the practice of the CMV patrols on our roadways escorting trucks with explosives and our emergency response control procedures must be upgraded. He also stressed the need for a national Commercial Driver License.

Wrapping up the conference on Thursday, Scheffer praised all those who contributed to making it a success. "I just hope New Jersey doesn't have to wait 34 years to host another conference."

Conference Coordinator Diane Rothman (center) of Driver Control is surrounded by members of her committee, Management and Operations Analyst Joanne Clarke (retired), Record Technician Jeanne M. Cirignano, Investigator Tom Bramley and Secretarial Assistant Ella Crane.

NJDOT hosts national bridge meeting



Principal Technician Laureen Miles, MIS and Administrative Analyst 1 DP Kevin Desfosse prepare for the registrants at the AASHTO meeting in Atlantic City.

NJDOT recently hosted members of the American Association of State Highway and Transportation Officials (AASHTO) at a five-day working session of the Subcommittee for Bridges and Structures Meeting in Atlantic City.

"More than 500 attendees, state engineers from the 50 states and Puerto Rico, bridge engineers from the Federal Highway Administration (FHWA), the authorities, the construction industry and the design consultant industry came to Atlantic City to listen, question and offer insights into the continuous development of the design specifications," said **Rod Lewis**, Supervising Highway Engineer and Vice Chair of the meeting.

The goal of the participants is to keep the *Standard Specifications for the Design of Highway Bridges* up-to-date and to revise the *AASHTO Load and Resistance Factor Design (LRFD) Bridge Design Specifications*. The current AASHTO LRFD edition is the 2002 interim with corrections.

"The preparation has been ongoing for two years," said **Harry Capers, Jr.**, the Manager of the Bureau of Structural Engineering and the State Bridge Engineer. Administrative Assistant **Sharon Loftin-Harrison** is credited with securing the location for the meeting, notifying participants, organizing meetings and creating the database for the registrations and requirements of all participants.

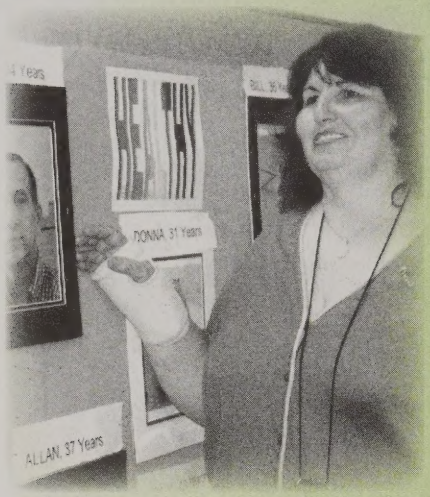
Assisting at the registration table and providing office support were Secretarial Assistant 2 **Lorraine Gabriel**, Administrative Assistant 2 **Denise Goddard** and Secretarial Assistant 2 **Diane Stratton**.

NJDOT honors retirees

Good wishes flowed during the two-day reception held in the Headquarters Cafeteria for the 540 June retirees (see enclosed insert).

Sentiments were shared among co-workers and friends; and voiced by the Commissioner and Deputy Commissioner **Jack Lettiere**, Assistant Commissioners **Kathleen Immordino**, **W. Dennis Keck**, **F. Rodney Roberson** (retired), **Arthur Silber**, MVS Director **Diane L. Legreide**, and others.

Commissioner **Jamie Fox** summed it up: "Take pride in all the good things that you have accomplished over the years. You have truly made a difference in the lives of the citizens of New Jersey and those who travel our highways every day."



Retiring after 38 years, Lynda Fejko (left) stands beside the "Morale Wall" she's decorated since 1972 to honor fellow employees in the Utilities and Railroad Engineering Unit and for special events, such as September 11. "She did a tremendous job at building up the spirits here . . .", said co-worker Donna Lennon. Steve Kovacs of Traffic Engineering (center) and Lois Tucker of Right of Way and Evelyn Medley of Project Support, Operations, (right) enjoyed the music and buffet at the retirement festivities.

McCleese sets up shop for retirees

Getting special gifts to special people can sometimes be a problem. Personnel Aide 1 **Zina McCleese** of the Employee Support found a solution by setting up a "Retirees Gift Shop" in the Main Office Building from July 9 through July 26.

"Nearly 540 employees retired from February 1 to July 1," said **Bill Bennett**, Acting Director of the Division of Employee Support. "To ensure they collected their official retirement gifts, we made them available for presentations at the many luncheons and dinners that took place in June. Nearly a hundred gifts found their way to retirees in this manner,"

There were 450 gifts left after the initial distribution — and there were other problems as well, according to Bennett. "Our postage account was too low to accommodate a mass mailing," he said. "One item, the popular Waterford crystal lamp, is breakable; past experience with mailing such items was unfavorable. Zina McCleese, in charge of our awards program, had no other choice but to open the gift shop."

McCleese set up a shop with a system. A retiree would receive a letter to pick up his or her gift, come to the shop on Tuesday, Wednesday or Thursday from 10 a.m. to 3 p.m., fill out a form and take the gift.

Personnel Aide 1 Zina McCleese presents retiree James Schilling with a Waterford crystal lamp at the "Retiree Gift Shop." Schilling retired after 32 years of service.

According to the years of service, retirees could choose from a Cross pen, a Safari carry-on flight case, a Bulova picture/frame clock, a clock radio, a Wittnauer watch, a Waterford crystal lamp or a set of Monarch luggage. All items had the state seal except the lamp.

"For the most part it was a rewarding experience," said McCleese. "I liked it! I got to meet a lot of retirees."

According to McCleese, only one of the 350 who came in to get a gift questioned its value. The others were excited and even surprised about receiving a gift at all, she said.

McCleese's co-workers, **Jackie Brown** and **Nancy Girton** assisted her in running the shop.

Headquarters Receptionist **Karen Reynolds** remarked that she knew a retiree when she saw one come into the building. "Their Bermuda shorts give them away," she said.

"The busiest time was before noon," said McCleese. "They would come in and chat with former co-workers or have lunch with them. The gift some particularly liked was the lamp, because they had received one before as a service award."

Think SNOW!

The 95-105 degree days of July and August aside, NJDOT is actively recruiting snow plow truck drivers and snow reps for the upcoming snow season that begins November 1.

If you hold a commercial driver license, or can qualify for one, and want to earn from $32.25 to $34.38 per hour as a driver or a rep, contact the Winter Operations Coordinator **Clint Griggs** at (609) 530-3740.

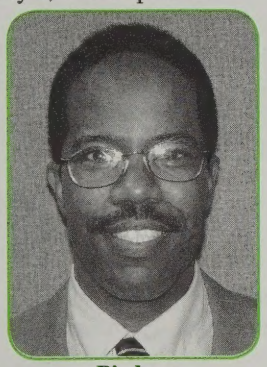
Commuters

Continued from front page

Bill Piedra, Supervising Transportation Analyst, is lead person. "It's important that people know about all the commute options available to them," said Piedra. "My job is to be the primary contact for staff and commuters on the status of park and ride projects and policy developments."



Piedra

Another important aspect of Piedra's job is to guide the advancement of Commissioner Fox's five-year plan for statewide park and ride facilities.

"Bill has identified nearly $155 million worth of park and ride concept plans that are yet unfunded," said **Noreen Cardinali**, Section Chief, Suburban Mobility. "He will be an advocate for increased funding as he tries to deliver an additional 13,000 new parking spaces to New Jersey citizens."

Engagement

Secretarial Assistant II **Kathy O'Donnell** of Freight Services and Dave Nemeth of Yardley, PA announced their engagement while vacationing on Paradise Island in the Bahamas in July.

Many thanks!

Pat Salt and her daughter Cathy thank the NJDOT employees who remembered her husband **John Salt Jr.** at the American Cancer Society "Relay for Life" event this spring. An Engineering Technician, Salt retired in July 2001 and died ten days later.

"It means so much to us that he is still remembered by all of his fellow workers," his wife said. "Thank you again."

Obituaries

Retired MVS Programmer **Charles L. Logan Jr**. died June 18 in Ewing. Daughters Bonnie-Renee Leftwich and Karen Suzanne Alvarez, a son Charles L. Logan III, his sisters Shirley Preston, Lena Carol Oliver and Lillian survive the Army veteran of the Korean War.

MIS Technician **Elizabeth (Jean) Taylor** of the DMV/COS Imaging Systems Center died in June. Her husband Everett, a son and two daughters survive her.

MVS Field Monitor **Patrick J. Moody Jr.** of the Morristown Internal Monitoring Unit died July 14 in Moonachie. The Army veteran of the Vietnam War is survived by his mother Alice, sister Barbara Errion and brother Dennis.

MVS retiree **Anna K. Turano Rofrano** died July 15 in Brick. Survivors include her son Jack, a daughter Dolores Seligman and grandhildren.

Former MVS employee **Eileen Majewski** died August 20 in Manahawkin. Survivors include her husband Bruce, sons Christopher, Mark and Stanley, daughter Susan Maltese, her sister Marie Smith and a grandson.
